

Where are you flying today? Who will you be talking to?

Lower Airspace Radar Service (LARS)

LARS provides one of three services for traffic outside controlled airspace:

- Basic Service
- Traffic Service
- De-confliction Service

Calling for a LARS service

Selected the frequency, listen out for a few seconds to check how busy it is, then call up:

“(Station) Radar, G-ABCD request (Basic/Traffic/De-confliction) Service”

When the Controller asks, provide your flight details clearly and concisely:

- Type
- Origin
- Destination
- Altitude
- Location

Read back the type of ATS being given, plus any executive instructions such as Heading, Level, Speed, Squawk, Clearance.

LARS WEEKDAY ONLY SERVICE

Frequencies in boxes denote weekday service only.
