

# Belfast Aldergrove

## Frequency Monitoring Code (FMC)

A Frequency Monitoring Code (FMC) is a unique code which shows air traffic control units who are equipped with radar that you are monitoring a specific frequency. Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service. The appropriate frequency should then be selected before entering the FMC into the transponder. You must remain outside controlled and notified airspace and are not in receipt of an Air Traffic Service. FMCs should only be used during the notified hours of operation of the nominated radar frequency.

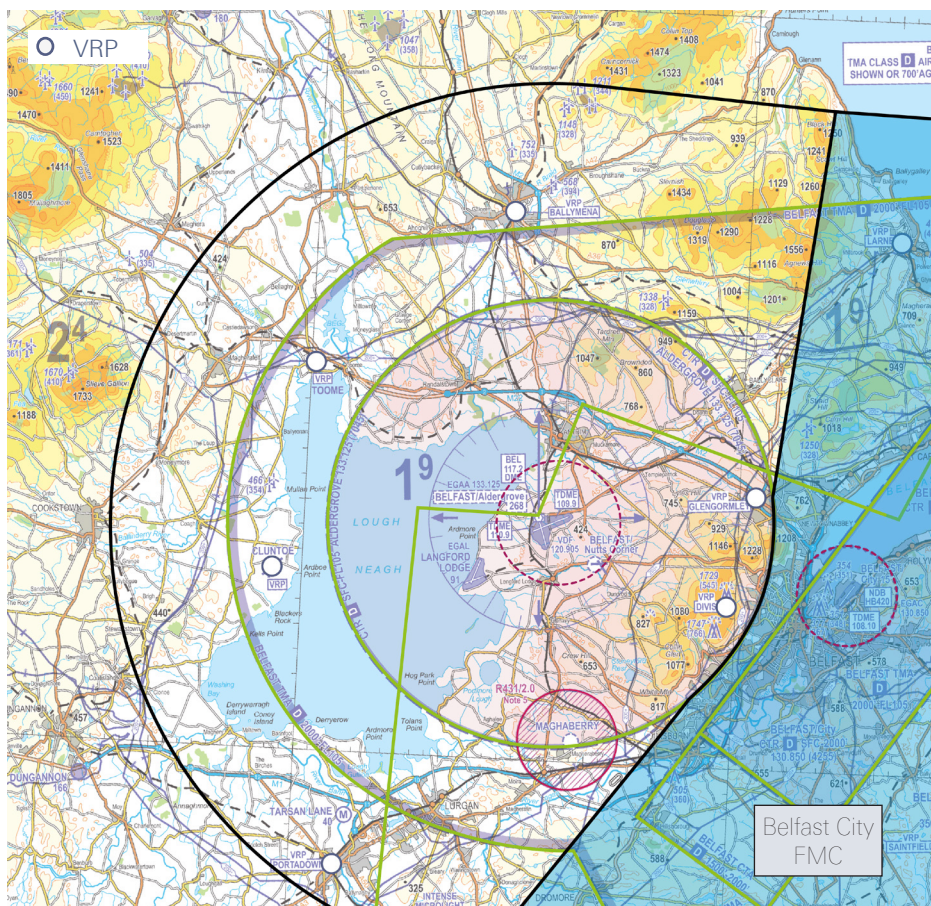

Aldergrove Approach **133.125 MHz**  
Frequency Monitoring Code **7045**

# Belfast Aldergrove Area

Aircraft operating outside controlled airspace but within the area shown are encouraged to monitor Aldergrove Approach on 133.125 MHz and select SSR code 7045.

Due to high terrain to the north and north west of Aldergrove it may not always be possible to monitor Aldergrove Approach below certain altitudes. Pilots who experience difficulty monitoring Aldergrove Approach are encouraged to obtain a service from Scottish Information.

Aldergrove Approach **133.125 MHz**
