

Belfast City

Frequency Monitoring Code (FMC)

A Frequency Monitoring Code (FMC) is a unique code which shows air traffic control units who are equipped with radar that you are monitoring a specific frequency. Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service. The appropriate frequency should then be selected before entering the FMC into the transponder. You must remain outside controlled and notified airspace and are not in receipt of an Air Traffic Service. FMCs should only be used during the notified hours of operation of the nominated radar frequency.

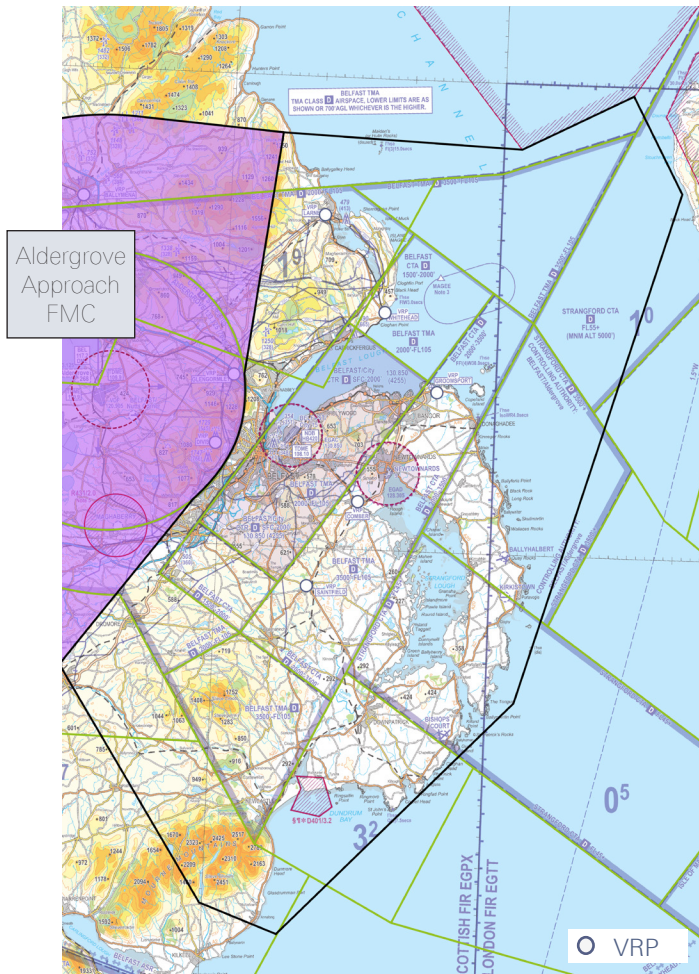

Belfast Approach **130.850 MHz**
Frequency Monitoring Code **4255**

Belfast City FMC Area

Aircraft operating outside controlled airspace but within the area shown overleaf are encouraged to monitor Belfast Approach on 130.850 MHz and select SSR code 4255.

Pilots operating outside controlled airspace but proximate to the Newtownards ATZ are encouraged to establish two-way communications with the Air Ground Communication Service at Newtownards to obtain information to allow their flights to be conducted safely.

Belfast Approach **130.850 MHz**
Frequency Monitoring Code **4255**
