# Gatwick
Frequency Monitoring Code (FMC)

A Frequency Monitoring Code (FMC) is a unique code which shows radar equipped air traffic control units that you are monitoring a specific frequency.

Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service. The appropriate frequency should then be selected before entering the FMC into the transponder.

You must remain outside controlled and other notified airspace and are not in receipt of an Air Traffic Service.

O VRP

Gatwick Director **126.825 MHz**
Frequency Monitoring Code **7012**

Gatwick FMC Area

Pilots operating outside controlled airspace and the Biggin Hill and Redhill ATZs but within the area shown overleaf and are not utilising the Lower Airspace Radar Service (LARS) provided by Farnborough Radar are encouraged to monitor Gatwick Director on 126.825 MHz and select SSR code 7012.

Pilots operating outside controlled airspace but proximate to the Redhill ATZ or Biggin Hill ATZ are encouraged to obtain a service from Redhill Tower or Biggin Approach, whichever is most appropriate, during notified hours of operation to obtain relevant information to allow their flights to be conducted safely.

Alternatively, a LARS is provided by Farnborough Radar (LARS East and LARS West) during the period notified in ENR 1.6 in the UK AIP.
