

A Frequency Monitoring Code (FMC) is a unique code which shows radar equipped air traffic control units that you are monitoring a specific frequency.

Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service. The appropriate frequency should then be selected before entering the FMC into the transponder.

You must remain outside controlled and other notified airspace and are not in receipt of an Air Traffic Service. FMCs should only be used during the notified hours of operation of the nominated radar frequency.

Norwich FMC area

Aircraft operating outside controlled airspace but within the area shown overleaf are encouraged to monitor Norwich Radar on 119.355 MHz and select SSR code 7350.

Pilots operating outside controlled airspace but proximate to the Old Buckenham ATZ are encouraged to establish two-way communications with Buckenham Radio to obtain information to allow their flights to be conducted safely.

Norwich Radar **119.355 MHz**
Frequency Monitoring Code **7350**
