

Southampton CTR and Solent CTA Frequency Monitoring Code (FMC)

A Frequency Monitoring Code (FMC) is a unique code which shows air traffic control units who are equipped with radar that you are monitoring a specific channel.

Before selecting an FMC, you should ensure that you are operating within the FMC area designated for the appropriate Air Traffic Service.

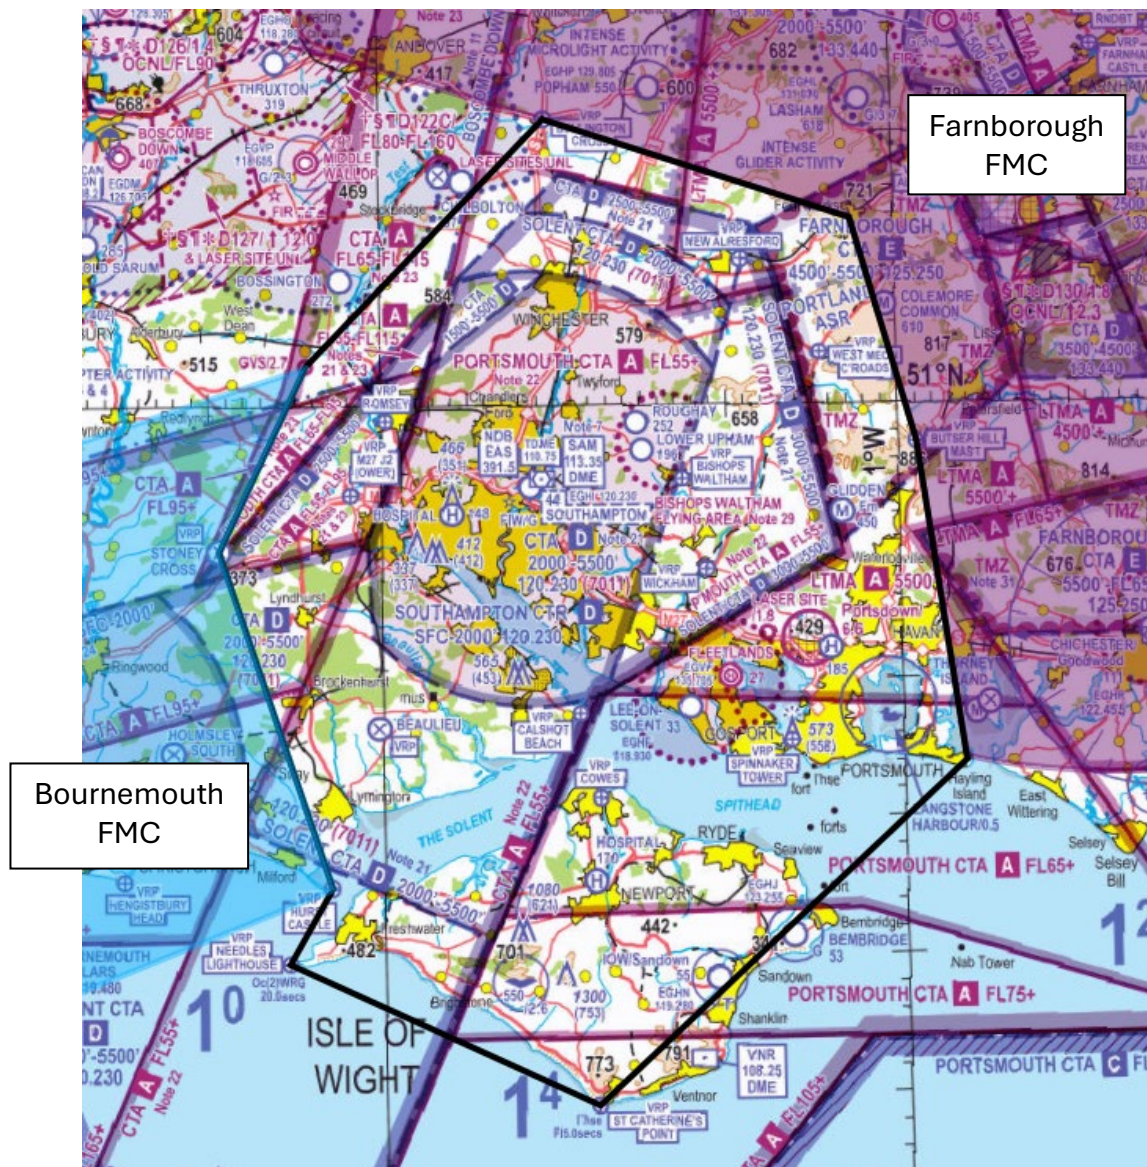

The appropriate frequency should then be selected, ensuring the volume on your radio is turned up, before entering the FMC into the transponder.

You must remain outside controlled and notified airspace and are not in receipt of an Air Traffic Service.

Solent Radar **120.230**

Frequency Monitoring Code **7011**

Aircraft operating outside controlled airspace, the Lee-on-Solent ATZ and the Fleetlands ATZ but within the FMC area shown with a black outline are encouraged to monitor Solent Radar on channel 120.230 and select SSR code 7011.

Pilots operating outside controlled airspace but proximate to the **Lee-on-Solent ATZ** are encouraged to obtain a service from Lee Information during its notified hours of operation to obtain relevant information to allow flights to be conducted safely.

Pilots operating outside controlled airspace but proximate to the **Portsmouth/Fleetlands ATZ** are encouraged to obtain a service from Fleetlands Information during its notified hours of operation.

Solent Radar **120.230**

Frequency Monitoring Code **7011**
