

YOUR LOCAL AIRSPACE

INFRINGEMENT TEAM (LAIT)

Working Together to Reduce Airspace Infringements

The Local Airspace Infringement Team (LAIT) brings together aviation stakeholders to discuss and implement local measures to reduce airspace infringements and improve aviation safety.

Who We Are

The LAIT is a collaborative partnership that may include:

- Aerodromes, Airports and small farm strips
- Air Navigation Service Providers
- Flying clubs and training organisations
- Local airspace users (including General Aviation and Military)
- The UK Civil Aviation Authority (CAA)

What We Do

- Review local airspace infringement trends and data
- Identify local airspace infringement risks and hotspots
- Develop initiatives to improve pilot awareness and promote effective flight planning
- Assess the suitability of local airspace structures and procedures and, where appropriate, support measures that could reduce infringement risk
- Encourage collaboration between local aviation stakeholders

Through collaboration, education and local engagement, the LAIT aims to reduce airspace infringements and promote the safe and efficient use of airspace for all users.

Interested in Contributing?

The success of a LAIT depends on collaboration across the aviation community. If you would like to learn more about your local LAIT, share ideas, or contribute to local airspace infringement reduction initiatives, speak to your airfield operations team or email lait@caa.co.uk

A list of LAITs can be found at <http://www.airspacesafety.com/infringement-groups/>
